

ENVIRONEXUS

Wodonga Sale Yard

LIGHTING AUTOMATION

The Northern Victoria Livestock Exchange is the largest livestock exchange in Victoria for its throughput of cattle and one of the largest in Australia.

NVLX conducts Prime, Store, Cow, Bull and Special Cattle sales as well as sheep and horse sales and has a ten year throughput average in excess of 205,000.

NVLX approached their electrical contractor Muntz Electrical, with the need for a simple lighting automation system. NVLX wanted to be able to control the system themselves with the help of simple programming.

Muntz Electrical with the help of their local Middy's branch were able to offer Environexus as a solution.

THE SOLUTION

5x ENVIRONEXUS RELAYS

1x BRIDGE

Lighting controlled by Smart devices

▼ BENEFITS ▼

SWITCH LIGHTS REMOTELY

MULTIPLE USERS

SCHEDULED LIGHTING TIMES

“ What I initially thought was such a complex solution, turned out to be so incredibly simple and affordable. I would have done this years ago if I had known it was this easy. ”

James Thompson NVLX Manager
